

Hypothermia: Critical Temperature, Critical Decisions

More information on tracks and track speakers coming soon. Limited free places available

Where and When?

January 14th 2018

Birnam Arts Centre, Station Road, Birnam, by Dunkeld,
Perthshire, PH8 0DS
<https://www.birnamarts.com/>

Aims of this Event:

Evidence shows that individuals suffering hypothermia related cardiac arrest can have a positive outcome when suitable patients are identified and managed appropriately. How can we turn the anecdotes into a predictable and co-ordinated pathway from pre-hospital response to rewarming, offering the best chance of survival to this group?

Session 1

First contact with the patient
Physiology of the hypothermic patient
Clinical decision making, knowing your pathways and options

Session 2

Prehospital response, from first responder to EMRS intervention
Handling, Treatment, Packaging
Discussion panel

Session 3

Rewarming, pre hospital and in the ED
ECMO pathways and processes
Hypothermia UK Registry

Who Should Attend?

Colleagues from Search and Rescue, first responders, prehospital clinicians and hospital clinicians who may treat hypothermic patients.
